GREENHOUSE – Coldframe FAQs

How will you ship my frame?

We use common carrier / Freight Trucks to deliver frames. We try to find the least expensive means to ship and you will know what the charges are before your purchase is finalized.

If you are within 200 miles of Cookeville, TN we may deliver on our truck.

Are the frames or kits hard to install?

No... We give you complete instructions, and if you do have any questions feel free to call us at 1-931-528-3390. Most frames can be installed in a day and kits can be installed in 2 days.

How are the ground staked attached ?

You will drive the side Stakes in the ground a minimum of 20 inches but can drive them up to 24 inches in the ground. You also May install ground stakes in Concrete if you should want to.

Will these greenhouses hold up in snow or ice?

Yes... under normal conditions they do an excellent job. They are made out of industrial grade tubing. Please understand that common sense tells us if you have 6 inches of wet snow on a greenhouse that it would be smart to sweep some off just for safety's sake.

Do you offer complete packages or kits?

Yes we do but you need to email us so we can custom bid those items.

Email us for a quote or Call us at 866-928-3390

Our greenhouse frames are made from the finest galvanized tubing available. All are made out of 1 3/8.065 thick tube and bows are spaced on 4 foot centers. End wall kits are available also. These units are very easy to put up and come with complete instructions. **For Specs please see below...**

All frames come complete with ---- Bows, Purlin, Ground Stakes, Cross Connectors, Misc Hardware, and instructions for installation.

**For a complete package please email us and we will be happy to quote.
